

OFFICE OF THE DIRECTORATE OF  
FAMILY WELFARE AND PREVENTIVE MEDICINE  
GOVERNMENT OF TRIPURA

No.F.13 (3-62)-DFWPM/PHS/DEWORM/2018/ (Sub-I)

Dated 18<sup>th</sup> June 2019

To

Most Rev. Lumen Monteiro  
Bishop of Agartala, Tripura

**Subject:** Request to facilitate for participation of Catholic schools/institutions in National Deworming Day August 2019.

Dear Most Rev. Bishop,

As the state of Tripura moves towards the implementation of its ninth round of National Deworming Day round on August 8, 2019 followed by mop-up day on August 19, 2019. The state government continues to be committed to include between 1-19 years age group who are enrolled in Government, Government aided, private schools and out of school as well under the aegis of National Deworming Day since its outset in 2015.

A consistent, high quality and high coverage NDD program will contribute in reducing the STH (worm) prevalence and slow reinfection rates. State has taken initiatives like; campaign on handwashing and distribution of nail cutters to induce long-term behavior change for well-being of school children. With 9.7%<sup>1</sup> of children enrolled in private schools as per Annual Status of Education Report (ASER) 2016 report, it is important to deworm these children over the rounds across state. Since, State of Tripura has an overall prevalence of above 60% (prevalence survey report shared with Government) and it's necessary to deworm all children between 1-19 years of age over the rounds with a fixed day approach. Findings from prevalence survey conducted in states also suggests that prevalence of STH in private schools is more than those enrolled in government schools.

As per the targets discussed at State Coordination Committee Meeting State has substantial number of children enrolled in the private schools (including run by Missionaries). Main challenge in their inclusion under NDD is the apprehension of adverse events among private school management and parents. In this context, please find WHO circular dated 22 December 2014 (**copy enclosed**) wherein it is clarified that children may be treated with Albendazole even without food. The Adverse effects of Albendazole are rare and minor (nausea and intestinal discomfort).

Role of Private Schools is pivotal to success of NDD in the state so a directive may kindly be issued from your end to all Catholic Schools in the state to actively participate in the National Deworming Day. In that reference, we have developed some materials uploaded on **google drive**, which can be used on aforesaid platforms to sensitize private schools and parents at large on importance of deworming for children.

We hope timely dissemination of these documents among Catholic Schools under Agartala diocese will complement State's efforts in engaging Private schools in the upcoming NDD August 2019 round. Further, we request you to kindly share institutional wise enrolled children via email at [nddtripura@gmail.com](mailto:nddtripura@gmail.com) by **July 8, 2019**

We look forward to your support and cooperation for successful implementation of NDD in the state.

Thanking you.

Yours faithfully,

*6*
