NATIONAL HEALTH MISSION
GOVERNMENT OF TRIPURA
No.F.13 (3-62)-DFWPM/PHS/DEWORM/2018/ (Sub-I)**

Dated 16th January 2020

To
The District Magistrate & Collector
West Tripura / Khowai / Sepahijala / Gomati/
South Tripura / Unakoti / North Tripura / Dhalai

Subject: Request to facilitate private school engagement including pre-primary private schools in National Deworming Day February 2020

Sir/Madam,

The state of Tripura moves towards the implementation of its tenth round of National Deworming Day (NDD) round on **February 17, 2020 followed by mop-up day on February 24, 2020**. The state government continues to be committed to include private schools under the aegis of National Deworming Day since its outset in 2015.

2. A consistent, high quality and high coverage NDD program will contribute in reducing the STH (worm) prevalence and slow reinfection rates. State has taken initiatives like; campaign on handwashing and distribution of nail cutters to induce long-term behavior change for well-being of school children. With 9.7%¹ of children enrolled in private schools as per Annual Status of Education Report (ASER) 2016 report, it is important to deworm these children over the rounds across state. Since, State of Tripura has an overall prevalence of 60% (prevalence survey report shared with Government) and it's necessary to deworm all children between 1-19 years of age over the rounds with a fixed day approach. Findings from prevalence survey conducted in states also suggests that prevalence of STH in private schools is as high as those enrolled in government schools.

3. As per the targets discussed at SCCM, state has substantial number of children enrolled in the private schools. Main challenge in their inclusion under NDD is the apprehension of adverse events among private school management and parents. In this context, please find WHO circular dated 22 December 2014 (**copy enclosed**) wherein it is clarified that children may be treated with Albendazole even without food. The Adverse effects of Albendazole are rare and minor (nausea and intestinal discomfort). Further, engagement of pre-primary private school in NDD is again another challenge due to operational and administrative issue.

4. This results in low participation from private schools in NDD since planning and preparatory activities of NDD like coordination committee meetings and trainings at districts and blocks ultimately loss of opportunity to deworm a substantial number of children. However private school coverage reports during NDD August 2019 and findings from independent monitoring were encouraging (**Annexure A**).

5. Engaging private schools in district and block coordination committee meetings, and special meetings called by District Magistrate has shown good results in their overall participation for the program. These engagement efforts should be continued in upcoming NDD round as well. Hence role of District Magistrates is pivotal to success of NDD in the state so a directive from your kind office to all private schools including pre-primary private schools will facilitate their participation in NDD.

6. Further, State recommends engagement of private schools at this stage of program implementation when district or block level training are being planned. In that reference, we have developed some materials uploaded on google drive (link will be shared separately) which can be used on aforesaid platforms to sensitize private schools and parents at large on importance of deworming for children.

7. We hope timely dissemination of these documents will complement state efforts in engaging private schools in the upcoming NDD February 2020 round in the State.

8. We look forward to continue cooperation and support.

Yours faithfully,

Mission Director (NHM)
Government of Tripura

Copy to:

1. The Director, Elementary Education department, Government of Tripura with request to direct the district level officials to strengthen the program for the upcoming NDD round.
2. The Director, Secondary Education department, Government of Tripura with request to direct the district level officials to strengthen the program for the upcoming NDD round.
